

## Wider Straight Web Type Steel Sheet Piling\*

Katsutoshi Shiga\*\*\*\* Yasuhiko Ueki\*\*\*\*\* Hiroo Nakagawa\*\*\*\*\*

### 1 Introduction

For straight web type steel sheet piling which is to be used for constructing quays and embankments in deep

larger than for the conventional type based on a decreased number of component piles, and tension in the circumferential direction is also increased. The interlock form and the dimension of the pile are
