

KC-50 Gas Shielded Arc Welding Wire for Robot*

Mikio Sakashita**

Takarou Matsumoto**

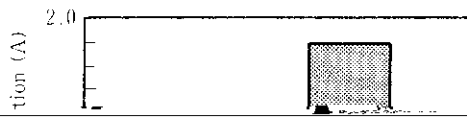

Table 2 Standard size, packaged weight and style

In recent years, automation such as robot welding is

Wire diameter (mm)	Style of winding
--------------------	------------------

Table 4 Mechanical properties of all deposited metal

larly smaller. The reason is that, based on the study of wire composition, globule-shifting becomes smoother and spatter generation at the time of globule-breaking-away has become smaller

4 Concluding Remarks
